

St John's C of E Primary School

Mathematics Curriculum Progression EYFS - KS1 - KS2

	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Number and Place Value	<ul style="list-style-type: none"> → Subitise (recognise quantities without counting) up to 5. → Verbally count beyond 20, recognising the pattern of the counting system → Have a deep understanding of number to 10, including the composition of each number → Automatically recall number bonds up to 5 and some number bonds to 10, including double facts. 	<ul style="list-style-type: none"> → Count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number → Count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens → Given a number, identify one more and one less → Identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least → Read and write numbers from 1 to 20 in numerals and words 	<ul style="list-style-type: none"> → Count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward → Recognise the place value of each digit in a two-digit number (tens, ones) → Identify, represent and estimate numbers using different representations, including the number line → Compare and order numbers from 0 up to 100; use <, > and = signs → Read and write numbers to at least 100 in numerals and in words → Use place value and number facts to solve problems 	<ul style="list-style-type: none"> → Count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number → Recognise the place value of each digit in a three-digit number (hundreds, tens, ones) → Compare and order numbers up to 1000 → Identify, represent and estimate numbers using different representations read and write numbers up to 1000 in numerals and in words → Solve number problems and practical problems involving these ideas 	<ul style="list-style-type: none"> → Count in multiples of 6, 7, 9, 25 and 1000 → Find 1000 more or less than a given number → Count backwards through zero to include negative numbers → Recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) → Order and compare numbers beyond 1000 → Identify, represent and estimate numbers using different representations → Round any number to the nearest 10, 100 or 1000 → Solve number and practical problems that involve all of the above and with increasingly large positive numbers → Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value 	<ul style="list-style-type: none"> → Read, write, order and compare numbers to at least 1,000,000 and determine the value of each digit → Count forwards or backwards in steps of powers of 10 for any given number up to 1,000,000 → Interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero → Round any number up to 1,000,000 to the nearest 10, 100, 1000, 10,000 and 100,000 → Solve number problems and practical problems that involve all of the above → Read Roman numerals to 1000 (M) and recognise years written in Roman numerals 	<ul style="list-style-type: none"> → Read, write, order and compare numbers up to 10,000,000 and determine the value of each digit → Round any whole number to a required degree of accuracy → Use negative numbers in context, and calculate intervals across zero → Solve number and practical problems that involve all of the above
Addition and subtraction	<ul style="list-style-type: none"> → Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally. 	<ul style="list-style-type: none"> → Read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs → Represent and use number bonds and related subtraction facts within 20 → Add and subtract one-digit and two-digit numbers to 20, including zero → Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial 	<ul style="list-style-type: none"> → Pupils should be taught to: solve problems with addition and subtraction: <ul style="list-style-type: none"> • using concrete objects and pictorial representations, including those involving numbers, quantities and measures • applying their increasing knowledge of mental and written methods → Recall and use addition and subtraction facts to 20 	<ul style="list-style-type: none"> → Add and subtract numbers mentally, including: <ul style="list-style-type: none"> • a three-digit number and ones • a three-digit number and tens • a three-digit number and hundreds → Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction → Estimate the answer to a calculation and use inverse 	<ul style="list-style-type: none"> → Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate → Estimate and use inverse operations to check answers to a calculation → Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why 	<ul style="list-style-type: none"> → Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) → Add and subtract numbers mentally with increasingly large numbers → Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy → Solve addition and subtraction multi-step 	<p>The Four Operations</p> <ul style="list-style-type: none"> → Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication → Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context

		<p>representations, and missing number problems such as $7 = _ - 9$</p>	<p>fluently, and derive and use related facts up to 100</p> <ul style="list-style-type: none"> → Add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> - a two-digit number and ones - a two-digit number and tens - two two-digit numbers - adding three one-digit numbers → Show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot → Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems 	<p>operations to check answers</p> <ul style="list-style-type: none"> → Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction 		<p>problems in contexts, deciding which operations and methods to use and why</p>	<ul style="list-style-type: none"> → Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context → Perform mental calculations, including with mixed operations and large numbers → Identify common factors, common multiples and prime numbers → Use their knowledge of the order of operations to carry out calculations involving the four operations → Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why → Solve problems involving addition, subtraction, multiplication and division
<p>Multiplication and division</p>		<ul style="list-style-type: none"> → Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher 	<ul style="list-style-type: none"> → Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers → Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals ($=$) signs → Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot → Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts 	<ul style="list-style-type: none"> → Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables → Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods → Solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects 	<ul style="list-style-type: none"> → Recall multiplication and division facts for multiplication tables up to 12×12 → Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers → Recognise and use factor pairs and commutativity in mental calculations multiply two-digit and three-digit numbers by a one-digit number using formal written layout → Solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects. 	<ul style="list-style-type: none"> → Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers → Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers → Establish whether a number up to 100 is prime and recall prime numbers up to 19 → Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers → Multiply and divide numbers mentally drawing upon known facts → Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context → Multiply and divide whole 	<ul style="list-style-type: none"> → Use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy

						<p>numbers and those involving decimals by 10, 100 and 1000</p> <ul style="list-style-type: none"> → Recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3) → Solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes → Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign → Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates 	
Fractions		<ul style="list-style-type: none"> → Recognise, find and name a half as one of two equal parts of an object, shape or quantity → Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity 	<ul style="list-style-type: none"> → Recognise, find, name and write fractions $\frac{1}{2}$, $\frac{1}{4}$, $\frac{2}{4}$, and $\frac{3}{4}$ of a length, shape, set of objects or quantity → Write simple fractions for example, $\frac{1}{2}$ of 6 = 3 and recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$ 	<ul style="list-style-type: none"> → Count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10 → Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators → Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators → Recognise and show, using diagrams, equivalent fractions with small denominators → Add and subtract fractions with the same denominator within one whole [for example, $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$] → Compare and order unit fractions, and fractions with the same denominators → Solve problems that involve all of the above 	<p>(Including decimals)</p> <ul style="list-style-type: none"> → Recognise and show, using diagrams, families of common equivalent fractions → Count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten → Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number → Add and subtract fractions with the same denominator → Recognise and write decimal equivalents of any number of tenths or hundredths → Recognise and write decimal equivalents to $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ → Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the 	<p>(Including decimals and percentages)</p> <ul style="list-style-type: none"> → Compare and order fractions whose denominators are all multiples of the same number → Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths → Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1 \frac{1}{5}$] → Add and subtract fractions with the same denominator and denominators that are multiples of the same number → Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams → Read and write decimal 	<p>(Including decimals and percentages)</p> <ul style="list-style-type: none"> → Use common factors to simplify fractions; use common multiples to express fractions in the same denomination → Compare and order fractions, including fractions > 1 → Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions → Multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$] → Divide proper fractions by whole numbers [for example, $\frac{1}{2} \div 2 = \frac{1}{4}$] → Associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example, $\frac{3}{8}$] → Identify the value of each digit in numbers given to

					<p>value of the digits in the answer as ones, tenths and hundredths</p> <ul style="list-style-type: none"> → Round decimals with one decimal place to the nearest whole number → Compare numbers with the same number of decimal places up to two decimal places → Solve simple measure and money problems involving fractions and decimals to two decimal places 	<p>numbers as fractions [for example, $0.71 = 71/100$]</p> <ul style="list-style-type: none"> → Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents → Round decimals with two decimal places to the nearest whole number and to one decimal place → Read, write, order and compare numbers with up to three decimal places → Solve problems involving number up to three decimal places → Recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal → Solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$, $\frac{1}{5}$, $\frac{2}{5}$ and those fractions with a denominator of a multiple of 10 or 25 	<p>three decimal places and multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places</p> <ul style="list-style-type: none"> → Multiply one-digit numbers with up to two decimal places by whole numbers → Use written division methods in cases where the answer has up to two decimal places → Solve problems which require answers to be rounded to specified degrees of accuracy → Recall and use equivalences between simple fractions, decimals and percentages, including in different contexts
Measurement	<p>→ Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity</p>	<p>→ Compare, describe and solve practical problems for:</p> <ul style="list-style-type: none"> • lengths and heights [for example, long/short, longer/shorter, tall/short, double/half] • mass/weight [for example, heavy/light, heavier than, lighter than] • capacity and volume [for example, full/empty, more than, less than, half, half full, quarter] • time [for example, quicker, slower, earlier, later] <p>→ Measure and begin to record the following:</p> <ul style="list-style-type: none"> • lengths and heights • mass/weight • capacity and volume • time (hours, minutes, seconds) <p>→ Recognise and know the</p>	<p>→ Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature ($^{\circ}\text{C}$); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels</p> <p>→ Compare and order lengths, mass, volume/capacity and record the results using $>$, $<$ and $=$</p> <p>→ Recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value</p> <p>→ Find different combinations of coins that equal the same amounts of money</p> <p>→ Solve simple problems in a practical context involving</p>	<p>→ Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)</p> <p>→ Measure the perimeter of simple 2-D shapes</p> <p>→ Add and subtract amounts of money to give change, using both £ and p in practical contexts</p> <p>→ Tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks</p> <p>→ Estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight</p> <p>→ Know the number of</p>	<p>→ Convert between different units of measure [for example, kilometre to metre; hour to minute]</p> <p>→ Measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres</p> <p>→ Find the area of rectilinear shapes by counting squares</p> <p>→ Estimate, compare and calculate different measures, including money in pounds and pence</p> <p>→ Read, write and convert time between analogue and digital 12- and 24-hour clocks</p> <p>→ Solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days</p>	<p>→ Convert between different units of metric measure (for example, kilometre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)</p> <p>→ Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints</p> <p>→ Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres</p> <p>→ Calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm^2) and square metres (m^2) and estimate the area of irregular shapes</p> <p>→ Estimate volume [for</p>	<p>→ Solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate</p> <p>→ Use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places</p> <p>→ Convert between miles and kilometres</p> <p>→ Recognise that shapes with the same areas can have different perimeters and vice versa</p> <p>→ Recognise when it is possible to use formulae for area and volume of shapes</p> <p>→ Calculate the area of</p>

		<p>value of different denominations of coins and notes</p> <p>→ Sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening]</p> <p>→ Recognise and use language relating to dates, including days of the week, weeks, months and years</p> <p>→ Tell the time to the hour and half past the hour and draw the hands on a clock face to show these times</p>	<p>addition and subtraction of money of the same unit, including giving change</p> <p>→ Compare and sequence intervals of time</p> <p>→ Tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times</p> <p>→ Know the number of minutes in an hour and the number of hours in a day</p>	<p>seconds in a minute and the number of days in each month, year and leap year</p> <p>→ Compare durations of events [for example to calculate the time taken by particular events or tasks]</p>		<p>example, using 1 cm³ blocks to build cuboids (including cubes)] and capacity [for example, using water]</p> <p>→ Solve problems involving converting between units of time</p> <p>→ Use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling</p>	<p>parallelograms and triangles</p> <p>→ Calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm³) and cubic metres (m³), and extending to other units [for example, mm³ and km³]</p>
<p>Geometry - properties of shapes</p>		<p>→ Recognise and name common 2-D and 3-D shapes, including:</p> <ul style="list-style-type: none"> • 2-D shapes [for example, rectangles (including squares), circles and triangles] • 3-D shapes [for example, cuboids (including cubes), pyramids and spheres] 	<p>→ Identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line</p> <p>→ Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces</p> <p>→ Identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]</p> <p>→ Compare and sort common 2-D and 3-D shapes and everyday objects</p>	<p>→ Draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them</p> <p>→ Recognise angles as a property of shape or a description of a turn</p> <p>→ Identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle</p> <p>→ Identify horizontal and vertical lines and pairs of perpendicular and parallel lines.</p>	<p>→ Compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes</p> <p>→ Identify acute and obtuse angles and compare and order angles up to two right angles by size</p> <p>→ Identify lines of symmetry in 2-D shapes presented in different orientations</p> <p>→ Complete a simple symmetric figure with respect to a specific line of symmetry.</p>	<p>→ Identify 3-D shapes, including cubes and other cuboids, from 2-D representations</p> <p>→ Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles</p> <p>→ Draw given angles, and measure them in degrees (°)</p> <p>→ Identify:</p> <ul style="list-style-type: none"> • angles at a point and one whole turn (total 360°) • angles at a point on a straight line and ½ a turn (total 180°) • other multiples of 90° <p>→ Use the properties of rectangles to deduce related facts and find missing lengths and angles</p> <p>→ Distinguish between regular and irregular polygons based on reasoning about equal sides and angles.</p>	<p>→ Draw 2-D shapes using given dimensions and angles</p> <p>→ Recognise, describe and build simple 3-D shapes, including making nets</p> <p>→ Compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons</p> <p>→ Illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius</p> <p>→ Recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles</p>
<p>Geometry - position and direction</p>		<p>→ Describe position, direction and movement, including whole, half, quarter and three-quarter turns</p>	<p>→ Order and arrange combinations of mathematical objects in patterns and sequences</p> <p>→ Use mathematical vocabulary to describe position, direction and movement, including</p>	<p>→ Recap Y2 objectives and prepare for Y4 objectives</p>	<p>→ Describe positions on a 2-D grid as coordinates in the first quadrant</p> <p>→ Describe movements between positions as translations of a given unit to the left/right and up/down</p>	<p>→ Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed</p>	<p>→ Describe positions on the full coordinate grid (all four quadrants)</p> <p>→ Draw and translate simple shapes on the coordinate plane, and reflect them in the axes</p>

			<p>movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anticlockwise)</p>		<p>→ Plot specified points and draw sides to complete a given polygon</p>		
Statistics			<p>→ Interpret and construct simple pictograms, tally charts, block diagrams and simple tables</p> <p>→ Ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity</p> <p>→ Ask and answer questions about totalling and comparing categorical data</p>	<p>→ Interpret and present data using bar charts, pictograms and tables</p> <p>→ Solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables</p>	<p>→ Interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs</p> <p>→ Solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs</p>	<p>→ Solve comparison, sum and difference problems using information presented in a line graph</p> <p>→ Complete, read and interpret information in tables, including timetables</p>	<p>→ Interpret and construct pie charts and line graphs and use these to solve problems calculate and interpret the mean as an average</p>
Ratio and proportion							<p>→ Solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts</p> <p>→ Solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison</p> <p>→ Solve problems involving similar shapes where the scale factor is known or can be found</p> <p>→ Solve problems involving unequal sharing and grouping using knowledge of fractions and multiples</p>
Algebra							<p>→ Use simple formulae</p> <p>→ Generate and describe linear number sequences</p> <p>→ Express missing number problems algebraically</p> <p>→ Find pairs of numbers that satisfy an equation with two unknowns</p> <p>→ Enumerate possibilities of combinations of two variables</p>
